UP LC

- Develop practical skills in SQL, Python, Power BI, and SSIS through hands-on data analytics and Business Intelligence projects.
- Write SQL queries to extract, transform, and analyze data for reporting and business insights.
- Build ETL workflows using SQL Server Integration Services (SSIS), including data loading and transformation.
- Create interactive dashboards and reports in Power BI and Microsoft Excel to support data-driven decision-making.
- Strengthen analytical, problem-solving, and financial analysis skills through academic coursework and self-directed projects.
